AUTOMATIC VOLTAGE REGULATOR (STABILIZER)

Power Star Series (2-steps Regulation)

- Delay time reconnection(2sec. / 10sec. / 30sec.) prevents devices
 from powerful surges
- > Provide stable output voltage through boost and buck stabilizer
- > Built-in thermal switch for over-temperature protection
- > Provide overload & short circuit protection
- > User-friendly visual LED status indicators

ODEL	I-468-600	I-468-800	I-468-1000
APACITY	600VA/300W	800VA/400W	1000VA/500W
INPUT			
ltage 2	220/230/240Vac		
Itage Range	172-276Vac		
equency	50/60Hz		
OUTPUT			
eps of Regulation	2-steps(1-step boost & 1-step buck)		
utput Receptacles	Schuko socket *3pcs for AVR & Surge protected		
Protection	Overload / Short Circuit: Manual reset circuit switch		
	Over-temperature: Thermal switch		
PROTECTION			
elay Reconnection	2 seconds / 10 seconds / 30 seconds		
STATUS INDICATORS			
ower On/Off LED	Green		
oost LED `	Yellow		
ick LED	Yellow		
ENVIRONMENT			
ımidity	0-95%(Non-condensing)		
pise Level I	Less than 40dB at 1M		
Imidity (0-95%(Non-condensing)
